

GANESH THANGAPPA

Service Delivery & Program Manager | Cloud Modernization & Solution Architecture | Enterprise Delivery Leader

Plano, TX | +1 (430) 666-5925 | ganesh_t18@yahoo.co.in | [linkedin.com/in/ganesh-thangappa-4345249b](https://www.linkedin.com/in/ganesh-thangappa-4345249b) | [ganesh18-sys.github.io](https://github.com/ganesh18-sys)

PROFESSIONAL SUMMARY

Seasoned IT delivery and solution leader with 14+ years across enterprise application design, application modernization, and cloud solution delivery, including 4+ years in service/delivery management. Proven record designing scalable, cloud-native architectures and leading end-to-end cloud transformation programs—defining migration roadmaps, re-architecting legacy platforms, and optimizing application performance to drive measurable business value. Deep Retail and Consumer Goods (CPG) domain expertise spanning Procure-to-Pay (P2P) and Order-to-Cash (O2C), invoice digitization, approval-workflow automation, and ERP/SAP payment-posting integration for an end-to-end view of the supply chain. Hands-on architect across Microsoft Azure, .NET/C#, REST APIs, and Oracle/SQL Server. Trusted client-facing leader of global onshore/offshore teams for a Fortune-50 consumer-goods enterprise (PepsiCo), with 5+ years of onsite U.S. experience—consistently delivering on time, reducing incidents, and improving CSAT.

CORE COMPETENCIES

Architecture & Design: Cloud-Native Architecture, Application Modernization, REST APIs & Microservices, Event-Driven Architecture, Serverless, Build-Once Reusable Integration, Solution & Enterprise Architecture Collaboration

Cloud & Infrastructure: Microsoft Azure (Blob, Functions, App Gateway, IIS, Storage, DevOps), AWS (EC2, S3, VPC, IAM), GCP, Windows Server, Cloud Migration, High Availability & Fault Tolerance

Program & Delivery Leadership: Service Delivery Management, Project & Program Management, Agile / Scrum / Waterfall, Stakeholder & Executive Communication, Risk & Escalation Management, Onshore/Offshore Global Delivery, CSAT & Release Management

Software Engineering: .NET & .NET Core, C#.NET, ASP.NET, RESTful Web API, WCF Services, AngularJS, jQuery, SQL / PL-SQL, Stored Procedures, Query Optimization

Data & Integration: SAP / ERP Payment-Posting Integration, ETL (SSIS, DIH), Teradata, Informatica, CMIS, IBM FileNet, EMC Centera, Data Quality & Governance

Automation & AI-Readiness: Invoice Digitization, Intelligent Document Processing, Bot / Process Orchestration Tooling, Workflow Automation, Observability & Performance Tuning PoCs

Domain: Retail, Consumer Goods (CPG), Procure-to-Pay (P2P), Order-to-Cash (O2C), Supply Chain Document Operations

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions (Client: PepsiCo)

Sep 2021 – Present

Service Manager – Projects (Onshore & Offshore)

Plano, TX & Chennai, India

- Led end-to-end delivery of 6 cloud-transformation applications, re-architecting the legacy Image Vision document platform into a cloud-native, load-balanced, fault-tolerant solution on Microsoft Azure—delivered on time and within budget.
- Architected a cloud-native Accounts Payable (P2P) and Accounts Receivable (O2C) document store on Azure Blob Storage and Azure IIS, enabling secure, scalable, and fast retrieval of business-critical documents across multiple regions.
- Migrated the enterprise content repository from CAS to Azure Blob with zero data loss and zero critical-severity incidents at cutover.
- Cut manual invoice-processing and document-handling effort by ~41% through C#/.NET metadata-extraction APIs driving automated indexing, archival, and SAP payment posting.
- Replatformed a legacy monolith into REST services consumed across multiple interfaces; partnered with Enterprise Architecture teams on cloud governance and security best practices.
- Led a 35-member onshore/offshore team—owning scope, cost, risk, and escalations—and drove incident reduction, faster time-to-release, and improved CSAT through disciplined Agile/Waterfall delivery.
- Built management tooling to monitor and orchestrate bots/processes and ran PoCs for observability, security, and performance tuning; mentored engineers on cloud and security best practices.

Cognizant Technology Solutions (Client: PepsiCo)

Oct 2017 – Aug 2021

Senior Associate – Projects

Plano, TX & Chennai, India

- Served as technical project lead for SAP payment-posting integration, coordinating internal stakeholders and external vendors to ensure seamless, error-free data exchange.
- Delivered the Data Management Organization (DMO) data-quality platform—building scorecards across SQL Server, SAP, Teradata, and Informatica that detect and report discrepancies and improve downstream reporting reliability.
- Engineered ETL pipelines (SSIS, DIH) and optimized SQL across multiple platforms; automated verification, conversion, and audit-sync reports supporting data-quality activities.

- Created project roadmaps, timelines, and risk-mitigation plans that landed initiatives within tight deadlines and minimized downtime during cloud transitions.
- Set up proactive alerting for application performance and security threats; ran technical PoCs evaluating emerging cloud technologies and mentored junior developers.

Cognizant Technology Solutions (Client: PepsiCo)

Dec 2014 – Oct 2017

Associate – Projects

Chennai, India · Monterrey, Mexico

- Developed and modernized Image Vision document-platform modules (C#/.NET, ASP.NET, RESTful Web API, AngularJS, jQuery) integrated with IBM FileNet and EMC Centera content repositories via CMIS.
- Built automation tools for space notification and cross-environment deployment, reducing manual operational effort and improving system stability.
- Supported the CAS global multi-channel sales platform—authoring Functional and Technical Specification documents (FSD/TSD) and driving defect closure across teams.
- Produced weekly/monthly status reports and productivity metrics for onshore leads and led knowledge transfer to new resources.

Infosys Limited

Aug 2011 – Dec 2014

Senior Systems Engineer / Systems Engineer

Chennai, India

- Designed and developed core modules of the Infosys BrandEdge digital-marketing platform using .NET WCF services and SharePoint, building custom controls and event handlers to extend functionality.
- Delivered a migration solution design using the client-side object model, including risk identification and management for designated site customizations.
- Improved application performance and reduced production defects through remedy-ticket resolution, peer code reviews, and rigorous unit testing across the full SDLC.

KEY PROJECTS

NextGen Digital Imaging (PepsiCo)

Objective: Migrate the legacy Image Vision platform to an integrated, cloud-native Next-Gen website with HTML5 UI and RESTful APIs on Azure.

Stack: Azure (Blob, Functions, IIS, App Gateway, DevOps, Storage), C#/.NET, ASP.NET, RESTful Web API, AngularJS, jQuery, CMIS, Oracle 19c; CAS (source content repository). Team size 35.

Outcome: Delivered 6 cloud-transformation applications with a load-balanced, fault-tolerant architecture; CAS-to-Azure Blob migration with zero data loss; ~41% reduction in manual document handling.

Data Management Organization – DMO (PepsiCo)

Objective: Build an end-to-end data-quality platform generating scorecards that compare data across sources and report discrepancies.

Stack: SQL Server, SAP, Teradata, Informatica, SSIS, DIH. Team size 5.

Outcome: Improved data quality and downstream reporting reliability through automated verification, conversion, and audit-sync reporting.

Image Vision (PepsiCo)

Objective: Modernize an advanced file storage, processing, and retrieval system spanning document storage and workflow services.

Stack: C#/.NET, ASP.NET, RESTful Web API, AngularJS, jQuery, CMIS, IBM FileNet, EMC Centera, Oracle 12c, SQL Server 2014. Team size 5.

Outcome: Delivered error-free modules and automation tooling that improved stability and reduced manual operational effort.

Computer Application & System Consulting – CAS (PepsiCo)

Objective: Support and maintain a global multi-channel sales platform spanning all routes to market, sales/delivery models, geographies, and mobile platforms.

Stack: C#/.NET, SQL, CAS platform. Team size 11.

Outcome: Authored FSD/TSD for change requests and drove timely defect closure, sustaining stable, reliable multi-region sales operations.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (VMs, App Gateways, Blob, Functions, DevOps, IIS, Storage), AWS (EC2, S3, VPC, IAM), GCP

Programming Languages: .NET Framework & .NET Core, C#.NET, ASP.NET, SQL, PL-SQL

Frameworks & Web: RESTful Web API, WCF Services, AngularJS, jQuery, SharePoint, CMIS

Databases: Oracle (12c/19c), SQL Server 2014, Teradata, Stored Procedures, Triggers, Query Optimization, Database Migrations

DevOps & Tools: Azure DevOps, TFS, GitHub, Team City, MS Visual Studio (2008–2015), TOAD, Enterprise Library, Visio

Integration & Data: SAP / ERP Payment Posting, ETL (SSIS, DIH), Informatica, IBM FileNet, EMC Centera

Methodologies: Agile, Scrum, Waterfall, SDLC, Quality Assurance, Release & Configuration Management

EDUCATION

B.Tech, Information Technology — Jeppiaar Engineering College, Chennai

2011
